

CD-ROM SIMTEL-20

DSK-363::SIMTEL20.DOC

Daß sich der Inhalt von CD-ROMs der Darstellbarkeit in Zeitschriften entzieht, haben wir schon oft berichtet. Immer ist es aber gelungen, ein Inhaltsverzeichnis und eine Dateienliste zu präsentieren. Die CD-ROM SIMTEL-20 sprengt aber auch diesen Rahmen, da es sich um viele kleine Utilities handelt. Allein das Inhaltsverzeichnis dieser CD-ROM hat einen Umfang von ca. 500k. Herr Dr. Cap hat freundlicherweise für die Leser der **PC-NEWS** den Abschnitt Text-Utilities durchgesehen und einige nützliche Programme im Beitrag "**Texten zum Nulltarif und anderes**" dokumentiert. Zunächst sehen Sie die Einteilung der CD-ROM SIMTEL-20 in der folgenden Übersicht. Danach folgt eine detaillierte

Dateienliste des Abschnitts Textutilities. Die von Dr. Cap getesteten Programme sind unterstrichen. Es gibt einige Möglichkeiten, sich eine Gesamtübersicht zu verschaffen: 1. Bestellen Sie als Clubmitglied DSK-363 beim PCC-TGM oder als nur-Leser der **PC-NEWS** bei der Redaktion. Wenn Sie einzelne Dateien brauchen, können Sie diese mit Diskette und Rückkuvert bei der Redaktion bestellen. 2. Wenn es viele Dateien sind, die für Sie interessant sind, lohnt es sich diese CD-ROM zu besorgen. Bezugsquelle: Firma Gloner, Dr.Heinstraße 8, 5620 Schwarzach, TEL: 06415/7215, FAX: 06415/7218, Preis: S 390,- inkl. MWST.
