

His Master's Voice (HMV) Stand 1.3.1995

Dieses Verzeichnis ist ein eindrucksvoller Beweis für die Leistungsfähigkeit einer von etwa 200 österreichischen FIDO-Boxen (Verzeichnis weiter vorne in diesem Heft). Hier wird in einem wirklich gemeinnützigen Sinn, von den Betreibern und Uploadern ein Service für alle geboten. Die Liste dient als Nachschlagewerk für alle HMV-User zwecks Einsparung von on-line-Zeit und damit Telefongebühren. Alle anderen User, die nicht im Wiener Raum wohnen, können die Dateien über den Diskettenservice bestellen. Die Spezialität von *His Master's Voice* ist ohne Zweifel der OS/2-Bereich.

1. Direkte Einwahl**a. als on-line-User**

User, die noch keine Einwahlberechtigung haben, füllen beim ersten Einwählen einen Fragebogen aus, der verifiziert wird. Als Mitglied des CCC oder des PCC-TGM ist die Mailboxbenutzung frei, Nichtmitglieder müssen für die Benutzung eine Gebühr entrichten.

Einmal eingeloggt, befinden Sie sich im Hauptmenü und können in das Dateimenü wechseln. Dort befinden sich die Optionen zum Up- und Download. Da Sie die gewünschte Datei auf Grund der nachfolgenden Liste genau kennen, müssen Sie nur Download, gefolgt von den Dateinamen angeben. Wenn Sie sich über Neuzugänge in einem bestimmten Area informieren wollen, gehen Sie auf *Bereich wechseln* und geben Sie den on-line-Namen des Area ein (erste Spalte in der rechtsstehenden Tabelle). Mit *Liste* bekommen Sie dann den Auszug dargestellt.

b. als FIDO-Point

FIDO-Points können die Dateien durch einen File-Request anfordern und müssen sich nicht durch on-line-Menüs quälen. Gerade für Points ist die Liste hilfreich, da Sie es sich erparen, on-line die Verzeichnisse absuchen zu müssen. Erklärung für die noch-nicht-Points: ein Point ist im Prinzip eine FIDO-Mailbox, die zwar über den FIDO-Adressieralgorithmus verfügt aber keine Mailbox nachgeschaltet hat. Daher kann ein Point jede Mailbox der FIDO-Net „pollen“ und Dateien „requesten“, wenn er den Namen weiß. Er kann das auch, wenn er nicht unmittelbarer User dieser Box ist. Er wird um keine Identifikation gefragt.

2. Bezug über den Diskettendienst

Sie können, wenn Sie noch über kein Modem verfügen, alle Dateien der nachfolgenden Liste auch über den Diskettendienst bestellen. Beachten Sie, daß alle Dateien komprimiert sind und mit den verschiedensten Kompressionsverfahren zu entschlüsseln sind. (ARC, LHA, PKUNZIP, ARJ...). Diese finden Sie unter dem Abschnitt DOSARC. Dort finden Sie zum Beispiel die Zeile:

ARC602.EXE 138539 03-14-89 ARC Utility (SEA) V6.02

Bestellen Sie:

DOSARC\ARC602.EXE

Alle Areas auf einen Blick

In der folgenden Tabelle, die auch ein Inhaltsverzeichnis für die detaillierten Dateienverzeichnisse ist, ist die erste Spalte der konkrete Namen des File-Area. Der nachfolgende Name, falls vorhanden, bedeutet, daß alle neu einlangenden Dateien dieses Area unter diesem Namen durch Points via Junktick abonniebar sind; siehe dazu auch den Beitrag über Informationsabos im FidoNet in diesem Heft.
